BE THE BEST STEELMAKER

NIPPON STEEL CORPORATION GROUP

Based on the long accumulation of technology through steelmaking, the Nippon Steel Group operates businesses in four areas: steelmaking and fabrication, engineering and construction, chemicals and materials, and system solutions, with the core business being steelmaking.

Steelmaking and Steel Fabrication

Engineering and Construction (Nippon Steel Engineering Co., Ltd.)

Chemicals and Materials (Nippon Steel Chemicals Co., Ltd.)

System Solutions (NS Solutions Corporation)

R&D Laboratories

The Nippon Steel Group has research laboratories in Fukuoka, Amagasaki, and Hasaki. These laboratories lead the world in manufacturing technology development that includes new product development and process improvement, mainly in high-growth sectors, as well as basic research to support these sectors.

PLATE

Nippon Steel contributes to enhancing the safety of structures and the development of society infrastructure by delivering high-performance steel plates for large industrial and social structures such as ships, bridges, and high-rise buildings; marine structures for gas extraction; and high-performance steel plates used for tanks and other energy-related products.

FLAT PRODUCTS

Nippon Steel supports various industries and people’s lives by delivering steel sheet used for auto components, electrical appliances, housing, beverage cans, transform- ers, and other goods. Processing production and processing bases worldwide, this unit provides high-quality, high-performance products and services in Japan and overseas.

BAR & WIRE ROD

Nippon Steel delivers high-quality, high-performance bars and rods to a wide range of industries including the automotive, construction, and industrial machinery industries. In the automotive business, this unit focuses on high products and uses important automotive components such as engine, drive train, and suspension parts.

CONSTRUCTION PRODUCTS

Nippon Steel delivers H-beams, steel sheet piles, steel pipe piles, rails, and other steel materials used in the civil engineering and construction sectors in Japan and overseas. By responding to diverse needs, this unit contributes to the development of infrastructure that supports people’s lives.

PIES & TUBES

Nippon Steel is a world-leader in high-end seamless pipes used in oil and gas development and other areas. We respond to diverse needs such as large-diameter pipes for pipelines, steel tubes for construction and industrial machinery, we provide high-quality, high-performance products and services in Japan and overseas.

RAILWAY, AUTOMOTIVE & MACHINERY PARTS

Nippon Steel is the only manufacturer of railway steel wheels and axles in Japan. This unit’s major products are railway rolling-stock components and forged crankshafts for automobiles. The unit has two manufacturing bases for railway wheels and axles, and four bases for crankshafts in the world.

TITANIUM

Utilizing titanium’s lighter, higher-strength, and corrosion-resistant properties, Nippon Steel is a world leader in titanium products for construction, aviation, general industries, and consumer-related applications.

STAINLESS STEEL

Nippon Stainless Steel Corporation provides steel customers with a wide range of high-quality stainless steel products that includes steel plates, sheets, bars, and wire rods by leveraging its advanced technologies in the world. This subsidiary has developed the world’s first hot-rolled stainless steel pipes with the “Hei” series, and a new type of duplex stainless steel.
