NIPPON STEEL CORPORATION

Company Name

Nippon steel
Integrated Report
Sustainability Report
BE THE BEST STEELMAKER

Based on the long accumulation of technology through steelmaking, the Nippon Steel Group operates businesses in four areas: steelmaking and fabrication, engineering and construction, chemicals and materials, and system solutions, with the core business being steelmaking.

NIPPON STEEL CORPORATION GROUP

PLATE & CONSTRUCTION PRODUCTS

Through the delivery of high-performance steels such as plates, H-beams, sheet piles, pipe piles, and rails, Nippon Steel contributes to the building and development of a wide range of infrastructure such as bridges and buildings, energy, e.g., wind power; construction; and railways, thereby securing the foundation of people's lives.

FLAT PRODUCTS

Nippon Steel supports various industries and people's lives by delivering steel sheet used to make automobiles, electrical appliances, housing, beverage cans, transformm-ers, and other goods. Having production and processing bases worldwide, this unit provides high-quality, high-performance products and services in Japan and overseas.

BAR & WIRE ROD

Nippon Steel delivers high-quality, high-performance bars and rods to a wide range of industries including the automotive, construction, and industrial machinery industries. In the automotive business, the unit focuses on high-end products used in important automotive components such as engines, drive trains, and suspensions.

PIPPES & TUBES

Nippon Steel is a world leader in high-end, seamless pipes used in oil and gas development and other energy areas. We respond to diverse needs such as pipelines, steel tubes for automobiles, and steel tubes for construction and industrial machinery, as well as producing products that include steel pipes, sheets, bars, and wire rods by leveraging its most advanced technologies in the world.

RAILWAY, AUTOMOTIVE & MACHINERY PARTS

Nippon Steel is the only manufacturer of railway steel wheels and axles in Japan. This unit's major products are railway rolling-stock components and forged crankshafts for automobiles. The unit manufactures and delivers components for railway wheels and axles, and also provides forging services for crankshafts in the world.

TITANIUM

In addition to titanium's lighter, high-strength, and extremely corrosion-resistant properties, Nippon Steel is utilizing the technologies accumulated in its long history of steelmaking to be a world leader in titanium products for industrial machinery/plants, building materials, automobiles, and aerospace.

STAINLESS STEEL

Nippon Steel Stainless Steel Corporation provides stainless steel products with a wide range of high-quality stainless steel products that include stainless pipes, sheets, bars, and wire rods by leveraging its most advanced technologies in the world. This subsidiary has developed the world's first Sn-added low-interstitial ferritic steel grades, named the "FW Forward" series, and a new type of duplex stainless steel.

Global Network (As of April 1, 2021)

Companies within World Steel Association definition of crude steel production statistics (parent company, subsidiaries, and equity method affiliates with over 25% ownership) (incl. USSMINN) are listed above. In addition, some wholly-owned affiliates less than 30% ownership are included, in either case. Nippon Steel provides semi-finished products to those companies or Nippon Steel sells those company's products (KGS, STS).

Bases in Japan

The mark indicates the location of other steelworks.
