Nippon Steel is taking up the challenge of transforming steelmaking

Creation of a steelmaking process with CO₂ emission reduction is identified as Nippon Steel's highest priority in management.

We are earnestly working on this environmental challenge now faced by our Earth.

Under the slogan "Make Our Earth Green", the Nippon Steel Green Transformation Initiative has started its activities.

Steel is and will be an indispensable material for people's lives.

For creating a prosperous society and a beautiful future of our Earth, we are continuing to take up this enormous challenge, together with you.
