1. Qualitative Information for the Third Quarter of Fiscal 2015

(1) Explanation of Operating Results

Global and Domestic Economic Conditions in the Third Quarter of Fiscal 2015

Overall global economic conditions stayed moderate with a slowdown in growth. Business conditions remained strong in the United States, and the recovery continued at a moderate pace in Europe. However, China's economic slowdown also became more pronounced, while the ASEAN economies were depressed.

Japan's economic recovery was delayed, as private consumption was sluggish and companies were cautious about capital investment.

Operating Results by Business Segment in the Third Quarter of Fiscal 2015

The Nippon Steel & Sumitomo Metal Corporation Group's business segments strived to respond to the changing business environment and to improve sales and earnings. An overview of operating results by business segment is shown below.

	(Billions of yen)			
	Net Sales		Ordinary Profit

* The third quarter (3Q) is the nine-month period from April 1 to December 31.

Steelmaking and Steel Fabrication

Japan's steel market had a weak undertone due to sluggish capital investment and other factors. Regarding overseas steel demand, on top of the slowdown in steel demand in China, the ASEAN region also experienced stagnant demand. At the same time, the slumping oil market led to sluggish steel demand from the energy sector. In the international steel market, partly due to the impacts from falling primary raw material prices and supply pressure from exports by Chinese steelmakers, prices declined significantly from the summer. While signs of a slight uptick in prices emerged at the year end, a drop in shipment volume and the impact of lower prices were quite significant in such an environment. As a result, the steelmaking and steel fabrication segment recorded net sales of ¥3,264.2 billion and ordinary profit of ¥154.2 billion.

Engineering and Construction

Nippon Steel & Sumikin Engineering Co., Ltd. continued actively advancing initiatives overseas, including commencing full-scale operations at newly constructed overseas facilities, and took steps to enhance the competitiveness of its existing operations. However, the company is confronting severe business conditions that include the impact of the sluggish oil market and other factors as well as declining investment activity by overseas customers. The engineering and construction segment posted net sales of ¥218.5 billion and ordinary profit of ¥6.5 billion.

Chemicals

Nippon Steel & Sumikin Chemical Co., Ltd. continued generating steady sales on the back of strong demand in the functional materials business for circuit board materials, display materials, and other products. The chemicals business secured steady sales and profit, supported in part by robust demand for styrene monomer, a general-purpose resin material. On the other hand, the coal chemicals business, particularly needle coke for graphite electrodes, struggled in extremely severe conditions, which were caused by intensified competition driven by falling oil prices and stagnant demand worldwide. The chemicals segment recorded net sales of ¥145.4 billion and ordinary profit of ¥3.7 billion.

New Materials

Nippon Steel & Sumikin Materials Co., Ltd. continued to record favorable sales in the electronic materials field for surface-treated copper wire. Demand was strong in the carbon fiber field for maintenance and reinforcement materials for tunnels, bridges, and other infrastructure, and also grew for products with high elasticity and high thermal conductivity properties. In the environmental and energy field, demand remained steady for metal substrates from developing countries. The new materials segment posted net sales of ¥27.1 billion and ordinary profit of ¥2.7 billion.

System Solutions

NS Solutions Corporation provides comprehensive solutions in the planning, configuration, operation, and maintenance of IT systems for clients in a wide range of business fields and develops leading-edge solutions services that respond to the changing business conditions of its clients. During the period under review, the company's business solution operation was firm in sectors such as manufacturing, distribution and services, and finance, while its service solution operation also remained brisk due to the steady expansion of the cloud service business, as one example. The system solutions segment recorded net sales of ¥156.7 billion and ordinary profit of ¥14.7 billion.

Sales and Profit for the Third Quarter of Fiscal 2015

Nippon Steel & Sumitomo Metal Corporation (NSSMC or the Company) posted consolidated net sales of ¥3,715.9 billion, operating profit of ¥147.6 billion, and ordinary profit of ¥185.0 billion for the third quarter of fiscal 2015.

As gain on sales of shares of subsidiaries and associates, settlement received, and other items were recorded as extraordinary profit, profit attributable to owners of parent amounted to ¥153.0 billion.

(2) Explanation of Information on Future Estimates, Including Consolidated Earnings Forecasts

Consolidated Earnings Forecasts

The global economy is expected to show only modest growth on an overall basis. The United States is likely to remain steady, mainly driven by private consumption, while Europe is likely to see a moderate recovery. However, slowing economic growth in China and the ASEAN countries is expected to persist. The Japanese economic recovery is anticipated to slowly materialize amid a delayed recovery in private consumption and companies becoming increasingly cautious about capital investment.

In the fourth quarter of fiscal 2015, recovery in production and shipments is likely to be stagnant in the domestic steel market, owing to a seasonal decline in demand from the construction industry and other factors. In overseas steel markets, despite some signs of an uptick in market conditions, the Company expects the current severe competitive conditions remain unchanged in the near term as Chinese steelmakers are continuing to expand exports. Moreover, steel demand from the energy sector is also likely to remain depressed.

Regarding consolidated ordinary profit for fiscal 2015, the Company's forecast has been revised from a previously-announced ¥250.0 billion to ¥200.0 billion, representing a decrease of ¥50.0 billion, due to the extremely harsh business environment. Nevertheless, the Company will continue to devote maximum efforts to its operations.

Basic Profit Distribution Policy and Year-End Dividend Distribution

NSSMC's basic profit distribution policy is to pay dividends from distributable funds at the end of the first half (interim) and second half (year-end) of the fiscal year in consideration of the consolidated operating results and such factors as capital requirements for investment and other activities aimed at raising corporate value and performance prospects while also considering the financial structure of the Company on both consolidated and non-consolidated bases. The Company has adopted a consolidated payout ratio target of around 20%–30% as the benchmark for the “payment of dividends from distributable funds in consideration of the consolidated operating results.” The level of the first-half dividend is set based on consideration of interim performance figures and forecasts for the full fiscal year performance.

The Company distributed a dividend of ¥3.0 per share* at the end of the first half but had not determined a year-end dividend distribution amount for the current fiscal year ending March 2016 when the first-half results were announced. Regarding the end of the second half (year-end) dividend distribution, the Company plans to distribute a dividend of ¥15.0 per share, in accordance with the basic profit distribution policy described above and in consideration of the earnings forecasts for the year and other factors.

*Notes: The Company carried out a share consolidation at a ratio of 10 shares to 1 share effective October 1, 2015. Assuming the first-half dividend is recalculated in accordance with the share consolidation, the full-year dividend per share will effectively be ¥45.0 per share and the consolidated payout ratio 30%.

2. Matters Concerning Summary Information (Notes to Financial Statements)

(1) Changes in Significant Subsidiaries during the Period:

None

(2) Adoption of Special Accounting Methods for the Preparation of Quarterly Consolidated Financial Statements:

Income taxes were computed by multiplying consolidated quarterly profit before income taxes by a rational estimate of the effective tax rate on consolidated profit before income taxes for the fiscal year including the quarterly period under review after adjustments for the application of tax-effect accounting.

(3) Changes in Accounting Principles, Changes in Accounting Estimates, and Retrospective Restatements:

1. Application of Revised Accounting Standard for Business Combinations, Etc.

“Revised Accounting Standard for Business Combinations (ASBJ Statement No. 21 revised on September 13, 2013, hereinafter referred to as the “Business Combinations Accounting Standard”), the “Revised Accounting Standard for Consolidated Financial Statements (ASBJ Statement No. 22 revised on September 13, 2013, hereinafter referred to as the “Consolidated Financial Statements Accounting Standard”), and the “Revised Accounting Standard for Business Divestitures (ASBJ Statement No. 7 revised on September 13, 2013, hereinafter referred to as the “Business Divestitures Accounting Standard”) have been applied from the first quarter of fiscal 2015. As a result, for subsidiaries the Company continues to control, differences arising due to changes in the equity portion are entered in capital surplus and costs associated with the acquisition of shares are now treated as expenses in the consolidated fiscal year in which they are incurred.

In addition, for business combinations that are implemented after the beginning of the first quarter of fiscal 2015, the allocation of the cost of acquisitions, as determined after review of provisional accounting treatment, is reflected in the quarterly consolidated financial statements for the quarter in which the business combination took place.

Additionally, the Company has changed the method of presenting consolidated quarterly net income and moved “minority interests in consolidated subsidiaries” to “non-controlling interests in consolidated subsidiaries”. To reflect these changes, the Company has reclassified its quarterly consolidated financial statements for the third quarter of the previous fiscal year and consolidated financial statements for the previous fiscal year.

The Company has applied these standards in accordance with the transitional treatment prescribed in Section 58-2 (4) of the Business Combinations Accounting Standard, Section 44-5 (4) of the Consolidated Financial Statements Accounting Standard, and Section 57-4 (4) of the Business Divestitures Accounting Standard, and will continue to apply these standards from the beginning of the first quarter of fiscal 2015 into the future.

The effect of these changes in accounting standards on the quarterly consolidated financial statements for the third quarter of fiscal 2015 was not material.

2. Application of the “Revised Practical Solution on Accounting for Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements”

At the beginning of the first quarter of fiscal 2015, the Company adopted the “Revised Practical Solution on Accounting for Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements” (Professional Issues Task Force Report No. 18 revised on March 26, 2015).

The application of this practical solution had no effect on the quarterly consolidated financial statements for the third quarter of fiscal 2015.
